Walkthrough for Coronavirus Word Logic puzzle 2 – 23/5/20

KEEP CALM AND CARRY ON, EVERYONE!

CARRY requires 2 Rs, and EVERYONE requires 3 Es. So the 16 letters in the grid are:

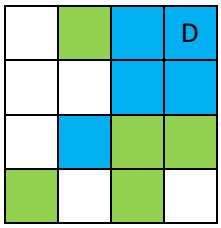
ACDEEEKLMNOPRRVY

There are 5 vowels, AEEEO, filling the green squares,

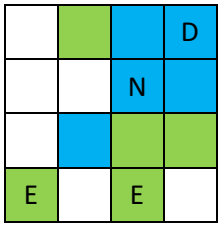
and the end letters in the blue squares must be PMDYN,

so the letters in the white squares must be CKLRRV.

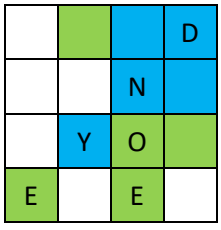
The top right letter is an end letter that is only adjacent to end letters, this can only be D:



D is adjacent to N, which is itself adjacent to 3 vowels, A, O, E (on green squares). So N must be diagonally down from D, and the 2 green squares at the bottom, which are not adjacent to N, must be Es:



Y is on a blue square. It cannot be underneath D, because it has to be adjacent to R (which is on a white square). Also if Y was to the left of D, then the vowel adjacent to it would have to be O (from EVERYONE) and there would be no way to make CARRY. So Y must be the blue square in the third row and O must be the empty green square adjacent to it:



KEEP needs two adjacent Es, which must be in the bottom right section of the board, so the empty vowel space in the bottom right is E, the letter above it P and then the last vowel square is A:

	A		D
		N	P
	Y	O	E
E		E	

The last end square is M, and L must be adjacent (from CALM):

	A	M	D
	L	N	P
	Y	O	E
E		E	

The Rs must be adjacent to each other and one must be adjacent to A, so neither can be in the bottom row, and there must be an R in the middle of the column of 3 empty squares on the left hand side:

	A	M	D
R	L	N	P
	Y	O	E
E		E	

Now C must be at the top left and the second R adjacent to the first:

C	A	M	D
R	L	N	P
R	Y	O	E
E		E	

Finally, V must be under the Y to spell EVERYONE, so K is in the corner:

C	A	M	D
R	L	N	P
R	Y	O	E
E	V	E	K
