

MATL481 PROBLEMS 1. Week 2, 7.2.2018

Q1. *Negative interest rates*

Use the Internet etc. to investigate this.

Q2. *Are markets self-correcting?*

Again, use the Internet to look into this, with particular reference to:
Greenspan; Friedman; (recall MATL480 Prob/Soln 1,2);
Efficient Markets Hypothesis; Eugene Fama.

Q3. *Are we heading for another Crash?*

Read the Nils Pratley *Observer* piece in W1a; do any Internet digging
you choose; have a good think about it; record your views.
