

## MATL481 PROBLEMS 1. Week 2, 6.2.2019

Q1. *Negative interest rates*

Use the Internet etc. to investigate this.

Q2. *Are markets self-correcting?*

Again, use the Internet to look into this, with particular reference to:  
Greenspan; Friedman; (recall MATL480 Prob/Soln 1,2);  
Efficient Markets Hypothesis; Eugene Fama.

Q3. *Are we heading for another Crash?*

Do any Internet digging you choose; have a good think about it; record your views.
